

LETTERS FROM OUR READERS

To: Editor, *The Angle Orthodontist*

RE: The Form of The Human Arch

I have 2 questions concerning the article "The Form of the Human Arch," published in *Angle Orthod.* 1998;68:29–36. Please let me know the answers.

If you substitute the mean depths and widths of dental arches into equation 2, the resulting formulas will be different from those printed on page 33 of the original article. For example, substituting the mean depth and width of Class II maxillary dental arch ($D = 39.5$ & $W = 51.1$) into equation 2, you will have:

$$Y = 119.740 \left[\frac{x}{51.5} + \frac{1}{2} \right]^{0.8.1} \left[\frac{1}{2} - \frac{x}{51.5} \right]^{0.8},$$

which is different from the fourth formula on page 33. What is the reason?

The mean depths and widths of all mandibular dental arches are greater than those of their respective maxillary ones. For example, the mean depth and width of Class I mandibular dental arches ($D = 47.4$ & $W = 59.3$) are greater than those of Class I maxillary dental arches ($D = 40.7$ & $W = 53.0$). How is it possible, knowing that, at least in Class I cases, maxillary dental arch usually covers mandibular 1?

Hassan Noroozi, DDS, MSc

Author's response:

Thank you for your comments regarding our recent article titled "The Human Arch Form." I do want you to

Letters to the Editor are considered for publication (subject to editing and abridgment). You may e-mail letters to the Editor at AngleOrtho@den1.den.vcu.edu. All typewritten letters must be submitted in duplicate and signed by all authors. Letters should not exceed 40 typewritten lines of manuscript text (excluding references). The same length restrictions apply to e-mail letters. Do not duplicate similar material being submitted or published elsewhere. Letters referring to a journal article must be received within 6 weeks of the article's publication. We do not acknowledge receipt of letters and there is no guarantee that your letter will be published. We cannot provide prepublication proofs. Submitting a letter constitutes your permission for its publication in any current or subsequent issue of the journal in any form or media now known or hereafter developed.

know that I, and I believe the profession, should be grateful for your astute observations. It is also nice to know that someone actually reads the articles! Your observations are valid. The mandibular and maxillary arch headings in Tables 1, 2, and 3 are reversed (maxillary arch should be substituted for mandibular arch, and vice versa). The constants were also mixed up as a result. Somehow, these errors escaped detection in reviewing the original manuscripts and the galley proofs. Revised Tables 1, 2, and 3, Figures 4 through 7, and the mean equations of the Class I, II, and III dental arch shapes are attached.

$$Y = 143.6 \left[\frac{X}{59.3} + \frac{1}{2} \right]^{0.8} \left[\frac{1}{2} - \frac{X}{59.3} \right]^{0.8},$$

Class I Maxillary Arch

$$Y = 123.4 \left[\frac{X}{53.0} + \frac{1}{2} \right]^{0.8} \left[\frac{1}{2} - \frac{X}{53.0} \right]^{0.8},$$

Class I Mandibular Arch

$$Y = 134.6 \left[\frac{X}{57.0} + \frac{1}{2} \right]^{0.8} \left[\frac{1}{2} - \frac{X}{57.0} \right]^{0.8},$$

Class II Maxillary Arch

$$Y = 119.7 \left[\frac{X}{51.5} + \frac{1}{2} \right]^{0.8} \left[\frac{1}{2} - \frac{X}{51.5} \right]^{0.8},$$

Class II Mandibular Arch

$$Y = 133.7 \left[\frac{X}{61.4} + \frac{1}{2} \right]^{0.8} \left[\frac{1}{2} - \frac{X}{61.4} \right]^{0.8},$$

Class III Maxillary Arch

$$Y = 120.9 \left[\frac{X}{58.1} + \frac{1}{2} \right]^{0.8} \left[\frac{1}{2} - \frac{X}{58.1} \right]^{0.8},$$

Class III Mandibular Arch

Revision of equations originally appearing in *Angle Orthod.* 1998;68:33.

Dr Noroozi, I am indebted to you for your observations. It is important that the data be presented correctly. Best regards.

Dr Stanley Braun
